

Short Term Training Course on Genetic Counselling Training with special emphasis on Prenatal, Postnatal Diagnosis & Reproductive Genetics

A Short Term Training Course on Genetic Counselling Training with special emphasis on Prenatal, Postnatal Diagnosis & Reproductive Genetics was conducted on 06.02.2018 at Council Room, Ramaiah Medical College.

Under the skill development program which the Government of India had recently started, Department of Biotechnology (DBT), Govt. of India had proposed Dr. Angel Beula.R, Senior Scientist from Cytogenetics Division, CRL to conduct a short term training course on “Genetic Counselling with special emphasis on Prenatal, Postnatal Diagnosis and Reproductive Genetics”. The course was conducted for 15 days, with 20 participants and 12 speakers to cover the entire spectrum of genetics and genetic counseling which included both hands on training and interactive lectures. The feedback received from the participants were very good.

It is the first time that the Government of India is funding for such a program in Genetic Counseling and we are proud to say that we are one of the very few institutions to have been chosen by DBT, Government of India, to conduct the above course.
