

World Physiotherapy Day celebrations

World Physical Therapy Day is observed every year on the 8th of September and, this year the occasion was celebrated for an entire week from 9th of September 2019 to 14th of September 2019. This year we focussed on bringing about awareness of pain as the theme for the year was chronic pain .We conveyed this through a week long free Physiotherapy consultation for all individuals living with pain, displaying educational content on pain across the hospitals through posters & media, and handing out flyers to individuals on the importance of continuing activity through pain. The overall response was good and well appreciated by all including the health professionals.
