Press Release

Dear Sir

It has come to our notice that one of our interns has claimed in Social Media that she was not provided with face mask and other safety equipment while on duty. Nothing can be far from truth. We wish to reiterate that as part of our commitment to treat the Covid-19 patients as per the GoK norms, we are providing all the necessary PPEs as prescribed by WHO, Government and other agencies to the Corona warriors. We continue to do so.

We have always given top priority to protect the interests as well as well being of our valued frontline warriors. As a matter of our ethical, moral and professional commitment we can assure you that all our staff and interns are always provided with PPE and all safety equipment in accordance with statutory guidelines at all times.

I request you to air this rejoinder as a response to the story on Ramaiah hospital.

Thanking you sincerely yours
